The newer peonies are very lovely. They have larger and fuller flowers, more rigid stems, and good substance. It is necessary to see them in bloom, to really appreciate the difference. An exhibition bed of 200 varieties is planted along the highway, and in the rear of the house are some of the newer peonies. There is a row each of the Auten, Brand and Franklin introductions, and a few from other sources. Orders for them are taken, and the roots supplied by the introducer. You are invited to visit the garden at blooming time.

Peonies grow slowly. It takes two to three years to produce good plants, but they increase in beauty each year, and last for a long time. For this reason it is advisable to carefully select your peonies, making cost the secondary consideration.

This list does not include all varieties grown here, but is composed of the newer peonies and the most popular of the older ones. If desired, a copy of the other list is obtainable.

TERMS: The regular 3 to 5 eye divisions are sent, dbl. divisions at double the price. Postage charges on all orders of \$5.00 and over are prepaid. For smaller orders allow 15% extra for first plant, and 10% for each additional one. On mail orders, a deposit of 25% in cash will reserve roots for fall delivery, and the balance sent, when notified that the roots are ready. Please order early. If cash is sent with an order of \$5.00 or over, an extra peony is sent.

EXPLANATION OF SYMBOLS: In order to make this list as condensed and practical as possible, certain markings have been used to indicate the following:

Introducer: Initials A, B, F. at extreme left indicate Auten, Brand and Franklin as introducers. Used only on newer varieties.

Time of Bloom placed before name. "E" Early, "M" Midseason, "L" Late, "VL" Very Late.

Fragrance Name underlined. Many dark rose and red varieties have only a slight odor.

Do not have data on many new varieties.

Semi-Double: Initial SD after rating. Many appear double, especially in the Auten reds. Some very lovely peonies are among these.

Rating: Official rating of the American Peony Society given after name, if rated.

Recently the A.P.S. reclassified peonies placing the blush whites and very light pinks in a class called Flesh. This list follows their selection in the various color classes, and is the first we know, that had made this distinction.

Join the American Peony Society. Cost \$3.00 per year and you receive four valuable booklets. Send money to us with your order, and we will take care of membership.

Culture: Place the plant in the ground, so that the buds on the crown are one to two inches below the surface, and the roots extend outwards. Firm soil. Use some commercial fertilizer below roots, well mixed with the soil, and an annual top dressing in early spring. Peonies are best planted in fall, but can be planted in early spring. Some bloom appears the first year.
